PROFILE

Java Developer student focused on building fullstack applications, with a strong interest in backend and cloud technologies.
I am interested in problem solving and understanding how technology can be used to create scalable and reliable solutions. During my studies, I have worked with Java, Spring Boot, and databases, as well as developing REST APIs and backend applications, combined with frontend development using React.
I am currently seeking my first internship where I can contribute, grow, and work on real-world projects alongside experienced developers.

TECH STACK

Backend

- Java
- Spring Boot
- REST API

Frontend

- HTML/CSS/JavaScript
- React

Databases

- MySQL
- PostgreSQL
- MongoDB

Tools/DevOps

- Docker
- Git & GitHub

PROJECTS

Social media backend API

Java • Spring Boot • PostgreSQL • Spring Security
Backend for a social media platform with authentication, REST APIs, and full CRUD functionality.

Hotel Booking Web Application

React • Node.js • MongoDB
Fullstack web application for hotel bookings built with React (frontend) and Node.js (backend).

EDUCATION

Java Development with Cloud Focus

Jensen Education
August 2025 - Present

WORK EXPERIENCE

CNC-operator - Somas Instrument AB

August 2024 - Present

- Operation and monitoring of CNC machines in a production environment
- Interpreting technical drawings and performing quality checks
- Identifying and resolving technical issues in the manufacturing process

Machine Operator - Nordiska Kardan AB

2022 - 2024

- Operation and monitoring of production machines

Shift Leader - McDonald's Karlstad

2018 - 2022

- Started as a crew member and progressed to a shift leader role
- Responsible for team coordination and leadership during shifts
- Ensured quality, service, and operational efficiency
